About Me

Highly organized and results-driven Product Analyst with hands-on experience in business and R&D settings. Skilled in SQL, Python, Excel, and data visualization tools like DOMO and Looker. Proven ability to develop dashboards, automate data pipelines, and extract actionable insights from complex datasets. Seeking to leverage my expertise in a challenging role within the field of data analytics.

Experience

Product analyst, February 2023 – Present, Browsi

- Collaborated with business and R&D teams to monitor KPIs, develop dashboards, and conduct A/B tests for new product features.
- Led the automation of data pipelines using Python, significantly improving efficiency and data accessibility across the organization.
- Utilized SQL, Python, Excel, DOMO, and Looker for advanced data analysis and visualization, supporting client retention and data-driven decision-making.

Laboratory Assistant, 2021 – 2022, Ben Gurion university

- Analyzed fMRI data in a psychological experiment using Excel and R.

Education

Data Analysis Course, Aug 2022 – Jan 2023, G-stat Academy.

- Learning and practicing SQL, Python and Excel.

B.Sc. - Biology and Psychology, 2019-2022, Ben Gurion University

Social Involvement

Hotline crisis counselor, 2020 - Present, Sahar

- Provide emotional support and guidance to individuals in distress.

Volunteer, Project TEN – Uganda, 2016 - 2017 The Jewish Agency

- Taught English, Math, and Creative Thinking to a Women's Empowerment Group.

Military

Security interrogation, 2014-2016, Intelligence Force.

- Interview and assess candidates for IDF security clearance.
